St Thomas Catholic School, Goodwood

## **Welcome to the World of 'Monkey Evolution'**

**Aim of the Game: Monkey Evolution will allow you to experience what it would be like to evolve from monkeys to simians to homosapeans to humans**

**This game has a scientific purpose to encourage children to want to learn more about the Theory of Evolution.**

### **What makes it Great?**

- It is user friendly with easy to understand instructions.
- Its designed to have a similar format to popular games encouraging you not to give up.
- Bright colours and music which required a higher level of coding.

**Monkey Evolution means you can see the visual and cultural changes faced by Homosapeans.**

**Interactive games are an exciting way to encourage someone to want to find out more about a topic even if it's educational.**

**Much like Evolution this game has the potential to evolve and add more levels such as adding natural disasters and other challenges faced.**

**Like allot of game creators I researched Evolution to ensure I understand the concept myself. The next part of this report shows some of the things I learnt during my research.**
